

Clawbada Designer Task List

Task 1: Custom Sidebar Navigation Icons

Replace the current system/Lucide icons with custom-drawn icons that match the game's illustrative style.

Icons needed (11 total):

Nav Item	Current Icon	Notes
Dashboard	Grid/squares	Home overview
Mining	Pickaxe	Treasure/mining theme
Battle	Crossed swords	Combat/arena theme
Breeding	Egg	Hearts/love/pairing theme
Evolve	Up-arrow circle	Transformation/power-up
Repair	Wrench	Fix/heal theme
Teams	People group	Squad/team of 3
Market	Shopping bag	Trading/marketplace
Activity	Line chart	Live feed/activity
Ranks	Trophy	Leaderboard/competition
Docs	Book	Documentation/guide

Specs: - Size: 24x24px base, provide @2x (48x48) for retina - Format: SVG preferred, PNG acceptable
- Style: Illustrative, matching the game's underwater/nautical theme - States: Default (muted) + Active (coral/highlighted) variants - See reference screenshot for current sidebar layout

Task 2: Home Page Game Mode Illustrations

3 illustrated card images for the "How to Play" section on the landing page. Each shows lobster characters in a scene representing that game mode.

Cards needed (3):

Mode	Scene Description
Mine	Lobsters mining treasure underground/underwater, pickaxes, gems, gold coins
Breed	Two lobsters together with a baby lobster/egg, hearts, nurturing scene
Battle	Lobsters in combat, arena setting, action poses, energy effects

Specs: - Roughly square aspect ratio with rounded corners - Style: Colorful, illustrated (see Crabada reference — but with lobsters, not crabs) - Size: 600x600px minimum - Format: PNG with transparency or solid background - Note: We do NOT have a "Loot" mode — only Mine, Breed, Battle

Task 3: Custom Cursor

A themed cursor replacing the browser default pointer. Two options to choose from:

- **Option A:** Red lobster pincher/claw
- **Option B:** Golden trident

Variants needed: - Default cursor (arrow replacement) - Pointer/hover cursor (hand replacement — e.g., claw open vs closed, or trident with glow)

Specs: - Size: 32x32px - Format: PNG (with transparency) or SVG - Hotspot: top-left area for default, finger-tip area for pointer - Keep it readable at small size — don't over-detail

Task 4: Battle Result Templates

Victory and Defeat banner illustrations for the battle results screen. Shown after a PvP battle concludes.

Banners needed (2):

Result	Style	Mood
Victory	Triumphant banner/ribbon, gold accents, celebratory	Bright, energetic, rewarding
Defeat	Tattered banner/ribbon, muted tones	Somber but not depressing, "try again" energy

Specs: - Underwater themed background elements (bubbles, seaweed, light rays) - Banner/ribbon with bold text area (we'll overlay "VICTORY" / "DEFEAT" text) - Width: 1200px, height: ~400-600px - Format: PNG with transparency (text overlaid by code) or with text baked in - See Crabada "DEFEAT" reference for style direction — ribbon with lobster characters holding the banner ends

Task 5: Navigation & Layout Texture Assets

Decorative textures and dividers to give the UI a nautical/handcrafted feel.

Filename	Size	Tileable?	Description
sidebar-wood.png	256x512	Yes	Driftwood plank texture for sidebar background. Vertical grain, weathered look.
divider-rope.svg	200x8	Yes (horizontal)	Nautical rope/twine, horizontal. Replaces plain <code>border-t</code> dividers.
nav-bottom-sand.png	512x64	Yes (horizontal)	Sandstone/driftwood strip for mobile bottom navigation bar.
header-wave.svg	1920x48	No	Decorative wave for top of content areas. Subtle, not overpowering.
divider-wave.svg	512x16	Yes (horizontal)	Small wave/water line divider between page sections.
footer-deco.png	512x32	Yes (horizontal)	Barnacle/coral cluster strip for footer or panel bottoms.

General specs: - Color palette should work on dark ocean backgrounds (#0e1e35 to #1b4568 range) - Textures should be subtle — enhance the theme without distracting from content - SVGs preferred where possible for scalability - PNGs should include transparency where appropriate

Color Reference

Token	Hex	Usage
Ocean deep	#0e1e35	Main background
Ocean mid	#142f4d	Secondary panels
Ocean surface	#1b4568	Sidebar, elevated areas
Sand	#2a1f14	Warm container accents
Driftwood	#4a3728	Nav/divider wood tones
Coral	#f97066	Active states, primary accent
Claw gold	#fbbf24	Headings, rewards, highlights
Teal	#3fb9a0	Success states, secondary accent

Delivery

- Drop finished assets into `packages/asset-gen/` or share via preferred method
- Name files as specified in the tables above where applicable
- Include @2x variants for any raster icons
